

Access 600mm Wide Cabinet Vertical Brush Strip Baffles.

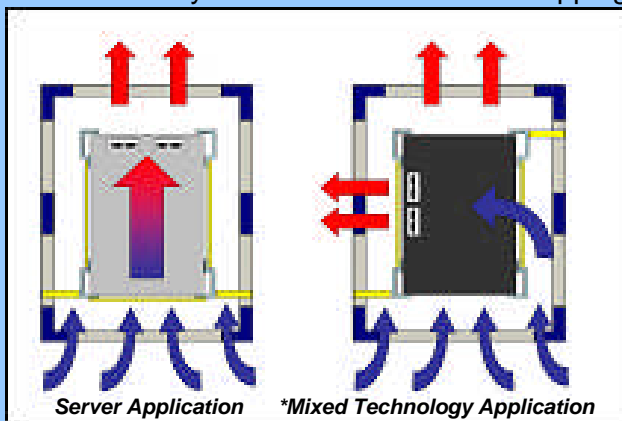

Now available to suit 600mm wide Access cabinets these quick fit vertical brush strip baffles have been designed to enhance the cooling efficiency of the Access cabinet by simply sealing off the area between the 19-inch mounting angle and the side panel.

One of the fundamentals for providing efficient cabinet cooling is the ability to stop hot air / cold air cross over. Failing to address this issue can result in the hot air expelled by the active equipment recirculating inside the cabinet structure. This scenario can ultimately lead to extreme hot spots, which in turn can cause premature equipment failure.

Taking a matter of minutes to fit, these vertical brush strip baffles can be easily retro fitted to all 600mm wide Access cabinets. Simply bolt the mounting brackets to the top and bottom frame and then clip the vertical baffle in position using the quick fit tool less fasteners. Once in situ the vertical baffles form an effective barrier to stop hot air recirculating to the front of the cabinet and when used in conjunction with blanking panels can significantly improve a cabinets cooling efficiency.

Importantly the baffles do not affect the ability to cable down the sides of a 600mm wide cabinet. Each of the vertical baffles incorporates a brush section which allows the baffles to be either fitted over existing cables or for additional cables to be passed through. In each case the bristles on the brush effectively seal around the cables stopping leaks.

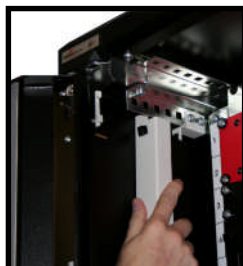

Like the 800mm wide variants the 600mm wide baffles can also be configured to suit a wide range of installations including those incorporating mixed technologies such as servers and switches.

Although the baffles can be staggered to create two "L" shaped voids Cooper B-Line recommends the use of 800mm wide cabinet for housing 19-inch mounted active equipment requiring side to side aspiration in order to maintain equipment cooling efficiency.

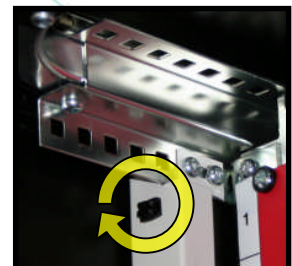

Fit brackets top and bottom

Move baffle into position

Clip baffle to brackets top & bottom (shown latched)

Secure baffle in position by rotating fixing through 90°

Technical Specifications & Part Codes

Material	1.2mm Thick Mild Steel
Brush Section	35mm wide Black Nylon bristles on an Aluminium Carrier
Finish	Painted either Light Grey NCS 1502-Y or Black RAL 9005
Supplied	Factory fitted as standard (can be retro fitted).

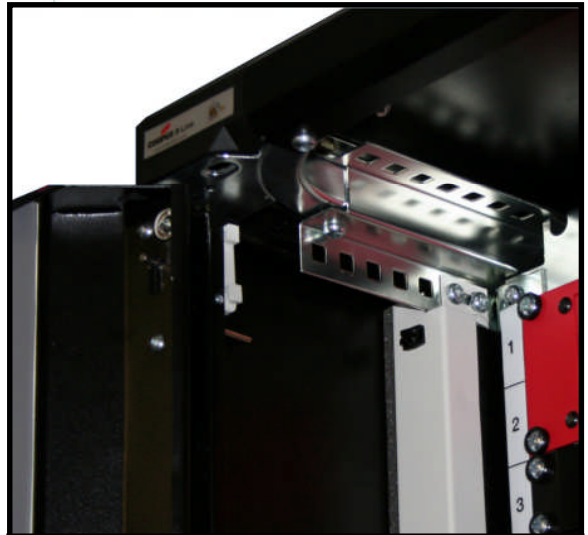

Order Code	Description	Lead Time	Shipping Weight
ACVBPA426A	Access Cabinet Vertical Brush Strip Baffles To suite 42U x 600mm wide cabinet Finished Light Grey NCS 1502-Y	5 – 7 Working Days	3.2kg
ACVBPA426B	Access Cabinet Vertical Brush Strip Baffles To suite 42U x 600mm wide cabinet Finished Black RAL9005	8 - 10 Working Days	3.2kg
ACVBPA476A	Access Cabinet Vertical Brush Strip Baffles To suite 47U x 600mm wide cabinet Finished Light Grey NCS 1502-Y	5 – 7 Working Days	3.8kg
ACVBPA476B	Access Cabinet Vertical Brush Strip Baffles To suite 47U x 600mm wide cabinet Finished Black RAL9005	8 - 10 Working Days	3.8kg

Each set comprises of

2 x Vertical brush strip baffles, 2 x Pairs of handed mounting brackets, 1 x Fixing kit.

Access Cabinet 600mm wide
Vertical Brush Strip Baffle
Finished - Black RAL 9005
