

## Velcro Cable Ties and Wraps.

New to Cooper B-Line's range of accessories comes a collection of Velcro® cable management ties and wraps. Specifically designed for use within both the two-post rack and 19-inch cabinet environment these cable ties and wraps are intended to allow quick and easy management of all types of cables including delicate copper and fibre communications cabling.

Importantly these cable ties and wraps largely engineer out the possibility of over compression and subsequent damage / loss in performance that can occur with the use of conventional zip ties. They also allow the quick and easy addition or removal of cables with the added benefit of reducing the risk of cables being damaged during the removal of zip ties. They also offer the benefit of better house keeping, as there is nothing to accidentally discard when re-cabling or re-patching and can be used time and time again.

Below are details showing most common applications of these products.

Pictorial Application	Description
	<p><b>Cable Wraps</b> Cable Wraps allow quick and easy grouping of cables. They can be used to secure cable runs to cable trays and baskets as well as general cable bundling to enhance cable installations.</p>
	<p><b>Cable Catches</b> These self adhesive backed Cable Catches allow easy mounting onto most clean, grease free surfaces. Ideal for applications where smaller volumes of cables are required these Cable Catches offer both horizontal and vertical cable installations and provide the ideal solution for neat and tidy installations.</p>
	<p><b>Cable Straps</b> Our Cable Straps offer the ideal solution for tying bundles of cables to fixed points vertically thanks to the securing eye incorporated into the design. Simply screw fix the Cabling Straps at regular vertical intervals within the cabinet then dress and secure the cable bundles in position for a neat and tidy solution.</p>
	<p><b>Cable Hangers</b> Like our Cable Straps our Cable Hangers offer the ideal solution for tying bundles of cables to fixed points, only this time horizontally. Again with an integrated securing eye the design allows our Cable Hangers to be screw fixed at suitable points within the cabinet offering a very flexible solution to cable management.</p>
